Avoid Childhood Vaccine Reactions by Asking:

- 1. Is my child sick or under stress right now?**
(Does your child have a temperature over 99F, teething, going through a growth spur?)
- 2. Do I know if my child is at risk?**
(Has your child had any history of previous reactions or any history of known allergies?)
- 3. Any history in the family of vaccine reactions or health problems?**
- 4. Do I know the adverse reactions to the vaccines given to my child?**
- 5. Do I know the manufacturer and lot number of the vaccine?**
- 6. Do I know how to report an adverse reaction?**
